

## Tapi Spotex 2

### Carpet stain remover

# C4c

#### Description

Water based spot remover for the removal of most common stains from any type of carpet or upholstery. Particularly effective to remove water based stains such as juices, coffee, tea, ketchup, wine or blood.

#### Key properties

- Unique formula for the removal of all common spot and stains
- Effective blend of surfactants
- Convenient ready to use trigger spray
- Incorporates new ONT - Air Neutralizing Technology

#### Benefits

- No need of complicated stain removal kits - a very simple solution for most type of stains
- Particularly effective on water based stains and spots
- Easy to handle and use for both emergencies and pre treatment
- Safe to use on all carpets
- The ONT technology destroys malodour molecules and therefore enhances the fresh apple fragrance

#### Use instructions

##### Dosage:

The product is ready to use. Use undiluted.

##### Application:

Dry vacuum clean the spot/stain. Removal any solid particles by gently scraping the carpet surface with a non scratching utensil. Remove any liquid by blotting with a clean, white absorbent cloth or paper towel. Spray product directly to the soiled area. Leave to act 30 seconds if necessary and blot the treated area with a clean cloth/sponge from the outside to the centre of the spot to prevent spreading. Blot (do not rub) with an absorbent cloth or tissue. Repeat if necessary. For best results, rinse with clean water to prevent from re-soiling. Allow the treated area to dry.

To treat large stains/spot, preferably use the rinse method.

##### Important:

Always test colour fastness and material compatibility in an inconspicuous place before use.

Colour fastness can take up to 24 hours to show. Therefore in case of doubts, the pre-test should be made one day before full treatment of carpet.

#### Technical data

- |                            |                          |
|----------------------------|--------------------------|
| • Appearance:              | clear, colourless liquid |
| • Relative density (20°C): | 1.00                     |
| • pH value neat:           | 6.8 - 7.3                |

The above data is typical of normal production and should not be taken as a specification.
